## Cambridge Order Picker License

Cambridge Order Picker License - Order preparation operation or order picking as it is more usually known is a method utilized in warehouse operations and consists of staff referred to as order pickers. The order picker's duty is to collect and take articles in specific quantities in order to fulfill the customer's orders before shipment. Order picking is a simple warehousing process. The efficiency in which this particular task is completed could be directly connected to the productivity of a supply chain. Hence, order picking is one of the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are particular types of order picking which consist of: wave picking method, pick to box method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method comprises the order picker only filling the boxes with stuff which are from their particular station. The box then moves on to other locations to until the order is done. In this particular technique, there is no movement of the order picker employees. In the wave picking method, the order pickers move about so as to gather the required items for several orders. The piece picking or picker to part method is similar where the order pickers or picker move to be able to collect the stuff required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, products are brought to the orderpicker by an automatic system like for instance an automatic storage system or a conveyor system. In the zone picking method, each and every order picker is assigned to one specific zone. They are responsible for just realizing order picking within this specific area.
