Cambridge Boom Lift Ticket

Cambridge Boom Lift Ticket - Boom Lifts are a table lift apparatus that could be lifted or lowered to varying heights, making this machine a helpful tool for many industrial applications. There are some unique types of Boom Lift consisting of knuckle booms, scissor lift trucks, and aerial platform lifts, each functioning differently.

The familiar aerial lift variation is regularly used at skiing lodges to transfer people who are not at ease using the snowboard lift. Working in a manner similar to that of an elevator, skiers are transported up the mountain in stages, stopping at stations along the way until they access the peak. Aerial hoists are also utilized in construction, moving workers securely up and down the sides of multi-level construction sites.

Scissor lifts are also in the boom jack class. They are used normally by utility providers as an idyllic way to allow workers to complete maintenance and repair on wires and cables that are attached to poles. Telephone, cable television and power companies have relied on the effectiveness of this style of boom lift for years.

Knuckle boom vehicles are designed to be used in rough terrain locales where the need to be able to change direction is necessary. This type of boom can fit into various tights spaces that a scissor lift cannot. Working amid multiple machines in a production facility or in near proximity between two walls, the knuckle boom also features a standard platform fitted with rails for protection and worker safety.

The variety of boom lift needed by firms will usually depend on the nature of the work needed. Fortunately, there are suitable designs for just about any duty.
