Cambridge Aerial Lift Training

Cambridge Aerial Lift Training - An aerial work platform is a mechanized access platform. This device provides access to otherwise not accessible areas for people or equipment. Also called an elevating work platform or aerial device, the device is usually used to access high areas. Construction and maintenance employees normally should make use of aerial work platforms on the job. They are utilized by firefighters for emergency access.

Meant for temporary application, aerial work platforms are distinguished from elevators, that provide permanent access to high places. An aerial work platform is meant to be operated by one individual, and is capable of lifting weights of not more than one ton. Several kinds have higher load limits. There are a variety of types of aerial work platforms; for instance, there is a "cherry picker" and a "scissor lift".

Several aerial work platforms are available equipped with compressed air connectors for power tools or electrical outlets. For specialist tasks, like for example lifting frames for window glass, an aerial work platform may come with special equipment.

Anyone needed to operate an aerial lifting machinery needs training, along with their supervisors. Members of Health & Safety Committees and representatives responsible for inspecting aerial device work places likewise should go through training. Trainees will know how to operate an aerial lift machine. They would likewise know the rules that apply to safely utilizing these machinery. Rules differ from province to province, and within federally regulated worksites.

Workers who work near or are required to be lifted by an aerial lifting machine needs to be aware of all the possible hazards. In a general safety session, an Aerial Lift Training Video could be shown to educate all of the employees who are lifted by them or work near them.

Aerial Lift Training Program includes modules focused on the following: Aerial Lift Devices and Operating Controls; Hazard Identification; Platform Positioning & Park Positioning and Pre Operational Checks for Aerial Lift Devices. The program is meant to train employees on the safe use of self-propelled, boom supported elevated work platform and self-propelled, elevated work platform. Employees who complete the program would be given a certificate, signed by a qualified person to confirm successfully completing a hands-on practical exam.
