Cambridge Counterbalance Forklift Training

Cambridge Counterbalance Forklift Training - Demand is always high for our popular Counterbalance Forklift Truck Training courses. A Counterbalance forklift is a forklift along with a weight that counters the balance, allowing the weight of the load to be spread evenly across the forklift arms. Counterbalance forklifts are made so the weight behind the center of gravity is counterbalanced by the weight on the lift. The load is projected out from the front of the machine so it is visible to the driver of the forklift. This kind of forklift truck should only be utilized on prepared surface or on level, stable ground.

Training is necessary for forklift operators to understand the proper method to distribute the load equally across the forklift arms. Trainees would learn how to lower and raise the load vertically and how to tilt the forklift mast both forwards and backwards between 5 and 15 degrees. People training would be taught the RTITB standards required for safe forklift operation. Trainees will likewise become familiar with the kinds of attachments for the arms of the forklift.

Kinds of Counterbalance Forklifts:

Walkie Pallet Trucks
The counterbalance forklift called the Walkie Pallet Truck is best suited for getting into spaces that are both small and cramped. This particular lift is really maneuverable and capable of accessing practically whichever tight space.

Walkie Stackers
The Walkie Stacker varies from the Walkie Pallet truck mainly when it comes to lift height. The Walkie Stacker can access tight areas and has extra lift for high stacking capability. Neither of the Walkie line of lifts could be ridden. The operator has to walk behind them.

Rider Pallet Trucks
Rider Pallet Trucks are designed to be ridden. These riding lifts are perfect for dock unloading and loading.

Wave Work Assist Vehicle
The counterbalance forklift known as the Wave Work Assist Vehicle could reach heights up to 17 feet.

Sit Down Counter Balanced Trucks
The Sit-down Counterbalance Forklift is made in three-wheel and four-wheel forklift designs. These durable and tough trucks are designed to be ridden.
